Lettuce

SUMMER Pepper seedlings

2 rows staggered, 18 inches apart,
6 plants per row/ 12 plants per bed
Summer planting May 16, Days to maturity 65 days for green /85 days for red
Install 6 stakes for pepper trellis.
Inter plant the pepper seedlings amongst existing lettuce bed as shown in diagram. Add first row of twine near the base of the plant sandwiching the seedling between the twine. As plant grows and additional layers of twine to give pepper support. Harvest peppers continuously until the beginning of September. Pull out all pepper plants, remove stakes and fill bed with fall spinach .
